

BIM POLICY

Huber Parking UK Limited

Huber Parking UK Limited firmly believe that the efficient and reliable exchange of information is key to a company's success. Building Information Modelling (BIM) is a vital tool in facilitating a collaborative and effective working partnership amongst all stakeholders involved in a project.

Among the many advantages of a successful BIM strategy, BIM has enhanced the life-cycle of our projects particularly in the following areas:

- Digital scope of BIM allows us to discover ever more efficient design and build processes.
- Transparency and collaboration between our designers, procurement and suppliers.
- Increased surety of cost and programme.
- Risk mitigation.
- Improved sustainability prospects.

Our commitment

- Development of our BIM capacity.
- Improved BIM awareness and know-how for relevant staff, including project teams.
- Engagement with our clients to enhance their understanding of the advantages BIM can offer with regards the delivery of their MSCP.

Our targets

- Analysis of advantages and opportunities BIM implementation could offer prior to the start of any project.
- Ongoing commitment, investment and development in BIM capacity to be prepared for the ever-increasing digital transformation of the construction industry.

We continue to be fully committed to the development of HUBER's Building Information Modelling capabilities as we realise that BIM is an integral tool in the successful delivery of our projects.
